## Integrating economics and ecology

**Figure 6**

**Outline of Basic Policies for a Sustainable Steady-State Economy**

- I. Cap-Auction-Trade systems for basic resources (especially fossil fuels).
- II. Shift the tax base from "value added" (labor and capital) to "that to which value is added" (resource throughput).
- III. Limit the range of inequality in distribution.
- IV. Move from fractional reserve banking system to 100% reserve requirements on demand deposits.
- V. Move from free trade and free capital mobility to balanced and regulated international trade.
- VI. Free up the length of the working day, week, and year
- VII. Stabilize population.
- VIII. Reform national accounts
- IX. Restore the Full Employment Act of 1945 (for the USA)
