Third Issue  
February 2014

## The story so far

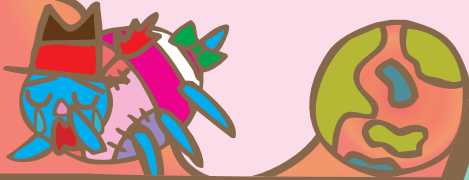

Gring, Woodin, and Water-Cat from the Water Kingdom are traveling to see Dr. Imai to discuss the monsters attacking the Water Kingdom and the pale look of Woodin. Ima-Spider, the gatekeeper for Dr. Imai, brought them to Minami-chan. He gave them magical coats and other gear for mountain climbing. Now they are heading to the mountain home of Dr. Imai.

Gring and his friends arrive at a river.

Awwwww!  
There is no ice.  
We can't cross  
the river!

This river is usually frozen, so we could have walked on the ice... But it seems the ice melted because of global warming.

I heard the white bears in the Ice Kingdom are in big trouble and are losing their homes as the ice melts.

Sob...

Yes, indeed. This problem is not just about rivers but also the oceans. White bears are losing their food and the playground for their offspring.

Poor white bears...  
Now, what shall we do?

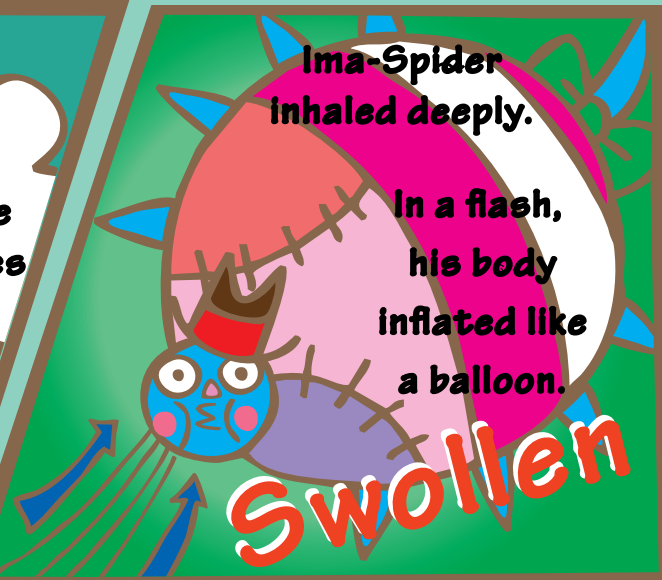

Leave it to me!  
This is where my skill comes in handy!

Ima-Spider inhaled deeply.

In a flash, his body inflated like a balloon.

**Swollen**

Come! Ride on!

**Splash**

Are you sure?  
I'm... worried...

It's a bit scary...

A wonderful view!

Are you... really sure?

After a while sailing...

Hmm?

**Air leakage!**

...

Thank you very much.  
I'm Gring, and these are  
Water-Cat, Ima-Spider, and  
Woodin. We are traveling  
together.

Oh! Woodin  
is

This..?

Ah...  
Woodin!

Now listen...  
our holy river  
has been  
polluted  
by someone...

We have been watching the river  
but couldn't find  
the offenders.  
Are you the one?

Litter

Where are  
the polluters?  
Find them!!

What?  
No way!  
No!  
We aren't!

Aren't you?  
You look suspicious!!

Tell us how to clean the river!  
Or you shall be punished.

How to clean the river...?  
I don't know....

Whisper...  
whisper...

Oh, I see.

Gring...  
Ima-Spider says  
that the first thing  
to do is...

Got It!

How about  
starting  
to clean?

If you pick up garbage and  
cherish  
the river  
water...

Flowering plants  
become healthier,  
water becomes clear,  
and you can fish.

The next issue will be published sometime around April
